

History of Faculty-Student Summer Research at Whitman College

Funding for faculty-student collaborative research at Whitman first began in 1995 when an endowment was established to honor Louis B. Perry, Overseer Emeritus and 8th President of Whitman College from 1959 to 1967 for his continuing leadership in the Whitman community. Funds for this endowment came from the Hewlett Foundation, the Sherwood Trust, the Horn estate, and several other donors.

In the years following the initial establishment of the Louis B. Perry Summer Research Award, other generous donors set up endowments to support student research in specific disciplines or areas of inquiry. To recognize those donors, the Provost and Dean of the Faculty office, which administers summer research funding, began to grant awards named after these endowments. Beginning in 2016, student-faculty collaborative research awards include Louis B. Perry awards and other named awards. Those awards are specified at the beginning of the list of awards for each funding year.
